AUST L 342811	70% v/v Isopropyl alcohol impregnated wipes	Single Use Only		Store below 25°C	75 Wipes	REF 6835

ISOWIPE*
HOSPITAL GRADE DISINFECTANT

Dispensing Directions

1. Remove large lid from container.
2. Locate centre sheet from middle of the roll and pull up.
3. Using the end of blue cap, insert the corner of the first sheet in the dispensing hole. **DO NOT PUSH YOUR FINGER THROUGH THE DISPENSING HOLE.**
4. Replace the large blue lid and remove the first sheet in a firm sideways pulling motion.
5. Always replace the blue cap to avoid evaporation of the alcohol.

Directions for Use

ISOWIPE* Bactericidal Wipe is a disinfectant wipe used on hard surfaces that have been previously cleaned. Surface must be pre-cleaned before disinfection for the process to be effective. To kill Bacteria and Fungi, wipe the pre-cleaned surface and let it dry for 10 minutes. Use straight from the container while moist.

- Use only on pre-cleaned surfaces.
- Do not use with other chemicals.
- Not intended for use on medical devices and other therapeutic goods.
- Do not use on skin.
- Do not mix with detergents or other chemicals.
- Use undiluted.
- Additional information is listed in the Safety Data Sheet.

For advice in an emergency, contact a Poisons Information Centre 131 126 (Aust) or 0800 764 766 (NZ).

WARNING: Flammable solid. Causes serious eye irritation. May cause drowsiness or dizziness. Keep away from open flames – No smoking. Wash hands thoroughly after handling. Wear eye protection. Avoid breathing vapours. Use only outdoors or in a well-ventilated area.

FIRST AID: If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove contact lenses. Continue flushing for several minutes until all contaminants are washed out completely. If eye irritation persists, get medical advice.
